

Level C:

Great Uncle Landowner has a parcel of land he owned. In his will, he left a map of the land that is divided into different regions. He wrote the names of each of his nephews and nieces on different regions of the map. He wrote the name in each region to indicate who will inherit that section of land. The regions range in size. Your job is to determine the fractional part of each region as it relates to the whole parcel. Examine the map below and determine the fraction piece of each region of land. Explain how you determined that fractional part awarded to each niece and nephew.
